CUSTOM MOSAIC MURAL ORDERING PROCEDURE

01

PROVIDE IMAGE

You provide image: rough sketch, CAD, photo, etc., Additionally provide the dimensions, location details, preferred material and chip size.

02

QUOTE WITH SKETCH

Price quote is provided with a drawing or sketch of mural for approval. Quote and drawing generally takes about 3-4 business days.

03

APPROVAL AND PAYMENT

Once drawing and quotation is approved, we collect 100% payment to begin production. Price includes shipping.

04

DELIVERY TO DOOR

Delivery time to your door is approximately 15 business days upon receipt of payment.

TIPS FOR MOSAIC MURAL INSTALLATION

01 INSPECTION

Please inspect the mosaic mural by laying it out on the floor before installation. Follow the guidelines, labels and installation map. No claims will be allowed after the mural has been installed.

02 PREPARATION

Make sure the installation surface is clean, smooth and level.

03 APPLYING ADHESIVE

Apply a layer of adhesive to a small section of the installation surface using the notched edge of a trowel. Don't try to work too far ahead or your adhesive may dry.

04 INSTALLING THE TILE

Install the mosaic sheets in correct order by referencing the labels and installation map. Apply the sheets of mosaic firmly to the setting material. Using a float tool, tap lightly across the surface to adhere the mosaic securely into the setting material. Allow 24 hours for the setting material to dry.

05 GROUTING

Mix the grout according to the manufacturers mixing instructions. Once mixed, spread into tile joints with a grout float in a diagonal direction, then squeegee in the opposite direction. Ensure that all joints are filled completely.

06 CLEANING

Several minutes after application, remove the excess grout by using a sponge with clean water and scrub in a circular motion, removing excess grout and smoothing all joints. Continue to wipe down the tiles until visibly clean.

07 DAILY CARE

Use water, tile or grout cleaner for ceramic and glass mosaics daily care. Stone murals may need to be waxed quarterly to keep the natural marble luster.
